

This document lists and otherwise details what is delivered against the subject part number.

In the Dalman factory Part numbers always have 6 digits (which may rarely be alphas) – the last digit represents the version or revision of the product; e.g. 404542 is the third issue ('0' being the first) of the product 40454. Items are always back compatible; so a 404541 can be replaced with a 404542 – but not necessarily the other way.

The latest version of the product will be shipped, unless otherwise negotiated.

Identity: -

What to order: -

| ORDER CODE | TITLE | DoQ |
|------------|-----------------|------|
| 10670 | SATSYNC7 KIT AC | EACH |

Description: -

Comprising:

- 1 x 30674 Satsync7.
- 1 x 40742 GPS Rx.
- 1 x 80641 Down cable.
- 1 x 90642 Mounting bracket – this can be wall or pole mounted (fixings not included).

Version: -

Current version is 106701; no previous versions have been delivered.

Usage: -

Used in applications as required.
Designed as a reference to drive base transmitters in simulcast PMR systems.

The GPS Rx supplies the 1PPS synchronizing input to the Satsync (GPS Rx powered from Satsync).

Deliverables against this Order Code -

One of the latest version of 10670; tested and set to factory default settings.
