

This document lists and otherwise details what is delivered against the subject part number.

In the Dalman factory Part numbers always have 6 digits (which may rarely be alphas) – the last digit represents the version or revision of the product; e.g. 404542 is the third issue ('0' being the first) of the product 40454. Items are always back compatible; so a 404541 can be replaced with a 404542 – but not necessarily the other way.

The latest version of the product will be shipped, unless otherwise negotiated.

Identity: -

What to order: -

Order Code	Title	DoQ
67701	Traffic Manager Additional Channel Option	Each

Description: -

Software license – fitted to Traffic Managers when Additional Channels are required. The option is delivered in the form of a hardware 'key' fitted inside the TM.

Version: -

Current version is 67701.
No previous versions have been delivered.

Usage: -

This option enables an additional channel on a Solar Traffic Manager unit. Each Traffic Manager unit can support up to 16 (1 default & 15 additional) channels and one Central Network Interface per channel. A Traffic Manager supports a maximum of 32 stations distributed across up to 16 channels, eg 1x32, 2x16, 4x8 etc.

Deliverables against this Order Code: -

One of the latest version of 67701.
