

This document lists and otherwise details what is delivered against the subject part number.

In the Dalman factory Part numbers always have 6 digits (which may rarely be alphas) – the last digit represents the version or revision of the product; e.g. 404542 is the third issue ('0' being the first) of the product 40454. Items are always back compatible; so a 404541 can be replaced with a 404542 – but not necessarily the other way.

The latest version of the product will be shipped, unless otherwise negotiated.

**Identity: -**

What to order: -

Order Code	Title	DoQ
67702	Traffic Manager Redundancy Option	Each

**Description: -**

Software license – fitted to Traffic Managers when TM redundancy is required. The option is delivered in the form of a hardware 'key' fitted inside the TM.

**Version: -**

Current version is 67702.

No previous versions have been delivered.

**Usage: -**

This option enables mirrored redundancy on Solar Traffic Manager units. Both "Primary" and "Secondary" units must be fitted with the option for it to work. This Order Code is for one example (in any sensible system two will be required).

The Secondary unit must be an exact replica, in terms of facilities and channel capacity, of the Primary unit.

**Deliverables against this Order Code: -**

One of the latest version of 67702.
