

This document lists and otherwise details what is delivered against the subject part number.

In the Dalman factory Part numbers always have 6 digits (which may rarely be alphas) – the last digit represents the version or revision of the product; e.g. 404542 is the third issue ('0' being the first) of the product 40454. Items are always back compatible; so a 404541 can be replaced with a 404542 – but not necessarily the other way.

The latest version of the product will be shipped, unless otherwise negotiated.

Identity: -

What to order: -

Order Code	Title	DoQ
H0790	SOLAR SYSTEM Handbook	Each

Description: -

Black A4 x ring binder containing Sections 0 to 14 of the published 10790 SOLAR System Technical publications in paper form.

This book contains details of both the Traffic Manager and the Network Interface.

Version: -

Current version is H0790-1; no previous versions have been delivered.

Usage: -

Used with all SOLAR Systems.

This is an option – it is not a necessary part of a SOLAR inventory. This is a copy of the information presented on CD issued with Traffic Managers.

Deliverables against this Order Code -

One of the latest version of H0970.
